

Mohammed Muzeeb Shaik

AI Engineer | Generative AI | Agentic AI | GraphRAG | Intelligent Automation | Azure AI Foundry

AI Engineer with 7+ years of engineering experience, building enterprise AI systems that solve real business problems end-to-end. Holds a Master's in Data Science from Universiti Malaya, a QS World-Ranked #58 institution, completed on-campus, and is a Claude Certified Developer (Foundations). Built a GraphRAG-powered chatbot for a Fortune 500 retail client, enabling deeper contextual search and multi-hop reasoning across enterprise knowledge. Introduced AI observability practices that strengthened evaluation, tracing, and visibility across production LLM systems. Architected an Intelligent Document Processing platform automating extraction and validation of unstructured business documents. Delivered a production-ready LLM chatbot for AirAsia Ikhlas, taking AI solutions from proof-of-concept to enterprise scale production.

📍 Bangalore, India

Skills

- **Programming Languages:** Python, R, SQL, Spark, Java
- **Generative AI & Agents:** GPT, Gemini, LangChain, LangGraph, Fine-tuning LLMs, MCP, AI Agents, Agentic Workflows, Prompt & Context Engineering, Vision AI, n8n, Crew AI
- **Cloud & AI Platforms:** Azure AI Foundry, Azure OpenAI, Azure AI Search, Azure Document Intelligence, Azure Container Apps, Azure Functions, Azure Blob Storage, AWS Bedrock, SageMaker, S3, GCP Vertex AI, Cloud Run
- **AI Monitoring & Observability :** Arize Phoenix, Prometheus, Grafana, LLM Tracing, Performance Monitoring, Evaluation Frameworks
- **Devops & Infra:** Docker, Kubernetes, Git, CI/CD, SDLC, STLC, GitHub
- **Data Visualization:** Power BI, Tableau
- **Machine Learning:** Scikit-learn, TensorFlow, PyTorch, NLP, Predictive Modeling, Classification, Clustering
- **RAG & Knowledge Systems:** RAG, GraphRAG, Hybrid RAG, Text2SQL, Text2Cypher, Neo4j, Knowledge Graphs, Vector Databases(FAISS, PineCone)
- **Backend & APIs:** FastAPI, RESTful APIs, GraphQL, Hasura, JSON Function Calling
- **Soft Skills:** Communication, Analytical Thinking, Strategic Planning, Attention to Detail, Stakeholder Engagement, Team Leadership, Agile Collaboration, Fast Learning

Certifications

Work Experience

AI / ML Engineer Zensar Technology (Bangalore [India] | Jan 2026 - Till Date)

- Built a GraphRAG powered enterprise chatbot for a Fortune 500 retail client, integrating Neo4j Knowledge Graphs, structured retrieval mechanisms, and LLM-based reasoning to enhance contextual search and multi-hop relationship discovery.
- Implemented AI observability and monitoring capabilities using Arize Phoenix, Prometheus, and Grafana to improve LLM evaluation, tracing, performance monitoring, and operational visibility across AI applications.
- Developed enterprise GenAI solutions on Microsoft Azure AI Foundry, integrating LLMs, workflow automation, and cloud-native services to accelerate Proof-of-Concept to production delivery.
- Architected and developed an AI-powered Intelligent Document Processing (IDP) platform leveraging OCR, LLMs, validation frameworks, and analytics pipelines to automate the extraction, validation, and processing of unstructured business documents.

DATA SCIENTIST (Intern) Air Asia Ikhlas (Kuala Lumpur [Malaysia] | May - July 2025)

- Designed and deployed a production-ready LLM-powered chatbot using Model Context Protocol (MCP), LangChain memory, and enterprise AI integration patterns, successfully delivering the solution within a 3-month internship while pursuing a Master's degree.

SENIOR SOFTWARE ENGINEER Aurigo (Bangalore [India] | 2018 Dec - 2024 Sept)

- Led cross-functional initiatives in collaboration with Product Development teams to incorporate AI, automation, and data-driven capabilities into enterprise software products
- Delivered end-to-end analytics and machine learning solutions involving data acquisition, preprocessing, model development, deployment, and business process optimization across multiple domains.

Graduate Development Programme DXC Technology (Bangalore [India] | 2018 Sept - 2018 Dec)

- Training in Agile Product Lifecycle along with Development practices

Achievements

- Built an MCP and LangChain-powered production-ready chatbot for AirAsia Ikhlas within a 3-month internship while concurrently pursuing a Master's degree.
- Delivered multiple end-to-end AI, ML and Intelligent Automation solutions from design and development through production deployment, including AI Agents, Intelligent Document Processing (IDP), GraphRAG chatbots, and workflow automation platforms.
- Recipient of multiple Bravo and Spot Awards for demonstrating technical excellence and organizational values.

Education

- **Masters** in Data Science 2024-2025 (**UM Kuala Lumpur**, Malaysia) - **3.98** CGPA
- **Bachelors** in E & C Engineering 2014-2018 (NMIT Bangalore, India) - **8.63** CGPA
